SQL #5

15 DAYS OF USING
SQL

Mastering Data Retrieval & Management with
PostgreSQL

Challenge

SYNTAX

```
1  -- Your manager is thinking about increasing the prices for films
2  -- that are more expensive to replace.
3  -- For that reason, you should create a list of the films including the
4  -- relation of rental rate / replacement cost where the rental rate
5  -- is less than 4% of the replacement cost.
6  -- Create a list of that film_ids together with the percentage rounded
7  -- to 2 decimal places. For example 3.54 (=3.54%).
8  SELECT
9      film_id,
10     ROUND((rental_rate / replacement_cost) * 100, 2) AS percentage
11 FROM film
12 WHERE (rental_rate / replacement_cost) * 100 < 4
13 ORDER BY percentage ASC;
```

notes

Melihat daftar film dengan sewa < 4% dari biaya penggantian, ID film dan persentasenya (dibulatkan 2 angka)

OUTPUT

Data Output		Messages	Notificat				
							
	film_id [PK] integer 	percentage numeric 					
1	417	3.30					
2	663	3.30					
3	52	3.30					
4	163	3.30					
5	733	3.30					
6	901	3.30					
7	762	3.30					
Total rows: 101		Query complete					

Challenge

SYNTAX

```
33 SELECT
34     COUNT(*) AS count,
35     CASE
36         WHEN total_amount < 20000
37         THEN 'low price ticket'
38         WHEN total_amount BETWEEN 20000 AND 150000
39         THEN 'mid price ticket'
40         WHEN total_amount >= 150000
41         THEN 'high price ticket'
42         -- ELSE 'high price ticket'
43     END AS ticket_price
44 FROM bookings
45 GROUP BY ticket_price
46 ORDER BY count DESC;
```

OUTPUT

Data Output			Messages	Notifica
	count	ticket_price		
	bigint	text		
1	205054	mid price ticket		
2	29994	high price ticket		
3	27740	low price ticket		

notes

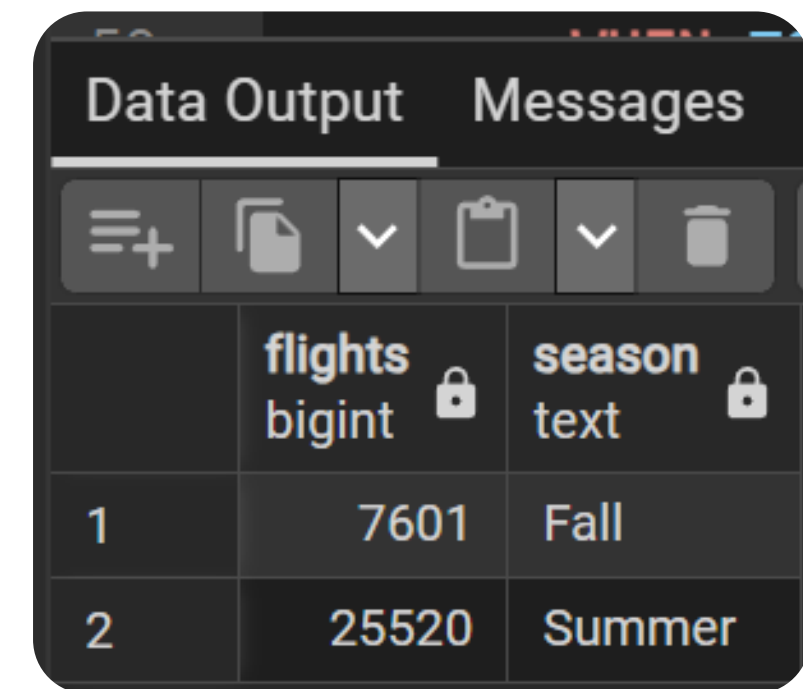

Menampilkan tier ticket price dari kolom total_amount, dengan tiga kondisi yaitu low, mid dan high ptice ticket

Challenge

SYNTAX

```
48 -- You need to find out how many flights have departed in the
49 -- following seasons:
50 -- • Winter: December, January, Februar
51 -- • Spring: March, April, May
52 -- • Summer: June, July, August
53 -- • Fall: September, October, November
54 SELECT
55     COUNT(*) AS flights,
56     CASE
57         WHEN TO_CHAR(scheduled_departure, 'Mon') IN ('Dec', 'Jan', 'Feb')
58             THEN 'Winter'
59         WHEN TO_CHAR(scheduled_departure, 'Mon') IN ('Mar', 'Apr', 'May')
60             THEN 'Spring'
61         WHEN TO_CHAR(scheduled_departure, 'Mon') IN ('Jun', 'Jul', 'Aug')
62             THEN 'Summer'
63         ELSE 'Fall'
64     END AS season
65 FROM flights
66 GROUP BY season
67 ORDER BY flights ASC;
```

OUTPUT

	flights bigint	season text
1	7601	Fall
2	25520	Summer

notes

Menghitung jumlah penerbangan berdasarkan musim dengan beberapa kondisi perubahan tipe data pada raw data

Challenge

SYNTAX

```
15 -- You want to create a tier list in the following way:
16 -- 1. Rating is 'PG' or 'PG-13' or length is more then 210 min:
17 -- 'Great rating or long (tier 1)'
18 -- 2. Description contains 'Drama' and length is more than 90min:
19 -- 'Long drama (tier 2)'
20 -- 3. Description contains 'Drama' and length is not more than 90min:
21 -- 'Shcity drama (tier 3)'
22 -- 4. Rental_rate less than $1:
23 -- 'Very cheap (tier 4)'
24 -- If one movie can be in multiple categories it gets the higher tier assigned.
25 -- How can you filter to only those movies that appear in one of these 4 tiers?
26 SELECT
27     title,
28     rental_rate
29 FROM film
30 WHERE rental_rate < 1;
31
32 SELECT
33     title,
34     CASE
35         WHEN rating IN ('PG','PG-13') OR length > 210
36         THEN 'Great rating or long (tier 1)'
37         WHEN description LIKE '%Drama%' AND length > 90
38         THEN 'Long drama (tier 2)'
