

SHOFIA FAUZIYAH

Course by NordEdu
SQL #3

15 DAYS OF USING
SQL

Mastering Data Retrieval & Management with
PostgreSQL

Challenge #1

SYNTAX

```
1  -- Your manager wants to which of the two employees (staff_id)
2  -- is responsible for more payments?
3  SELECT
4      staff_id,
5      SUM(amount) AS total_amount,
6      COUNT(*) AS count_amount
7  FROM public.payment
8  GROUP BY staff_id;
```

notes

OUTPUT

Data Output				Messages	Notifications
	staff_id smallint	total_amount numeric	count_amount bigint		
1	2	33927.04	7992		
2	1	33489.47	8057		

Menghitung total nilai pembayaran dan jumlah transaksi untuk mengetahui siapa yang melayani pembayaran customer payment lebih banyak

Dari result tersebut, didapatkan higher overall payment yaitu staff_id 2 dengan `total_amount 33927.04

Challenge #2

SYNTAX

```
18 -- How do these amounts change if we don't consider amounts
19 -- equal to 0?
20 SELECT
21     staff_id,
22     SUM(amount) AS total_amount,
23     COUNT(*) AS count_amount
24 FROM public.payment
25 -- WHERE amount <> 0
26 WHERE amount != 0
27 GROUP BY staff_id;
```

OUTPUT

Data Output

Messages

Notifications

SQL

	staff_id smallint 	total_amount numeric 	count_amount bigint 
1	2	33927.04	7983
2	1	33489.47	8042

notes

Menampilkan total pembayaran dan jumlah transaksi setiap staf (staff_id) dengan tidak menghitung transaksi yang nilainya 0

Challenge #3

SYNTAX

```
36 -- Which employee had the most sales in a single day (not
37 -- counting payments with amount = 0?
38 SELECT
39     DATE(payment_date) AS date,
40     staff_id,
41     SUM(amount) AS total_sales
42 FROM public.payment
43 WHERE amount <> 0
44 GROUP BY DATE(payment_date), staff_id
45 ORDER BY total_sales DESC;
```

notes

Mencari highest sales amount dari staff berdasarkan penjualan per hari, tanpa menghitung transaksi bernilai 0, lalu mengurutkannya dari penjualan tertinggi ke terendah.

OUTPUT

Data Output				Messages	Notifications
	date date	staff_id smallint	total_sales numeric		
1	2020-04-30	2	2548.14		
2	2020-04-30	1	2485.31		
3	2020-03-20	2	1555.47		
4	2020-03-02	1	1515.56		
5	2020-03-02	2	1423.59		
6	2020-03-23	1	1415.59		
7	2020-03-21	2	1408.77		
8	2020-04-29	2	1384.74		
Total rows: 82		Query complete 00:00:00.258			

Staff_id 2 memiliki nilai penjualan yang paling tinggi pada tanggal 2020-04-30 dengan total sales 2548.14, hasil perhitungan tanpa memasukkan nilai amount = 0

Challenge #3

SYNTAX

```
47 -- Your manager wants to get a better understanding of the
48 -- films.
49 -- That's why you are asked to write a query to see the
50 -- • Minimum
51 -- • Maximum
52 -- • Average (rounded)
53 -- • Sum
54 -- of the replacement cost of the films.
55 SELECT * FROM film;
56 SELECT
57 MIN(replacement_cost),
58 MAX(replacement_cost),
59 ROUND(AVG(replacement_cost),2) AS AVG,
60 SUM(replacement_cost)
61 FROM film;
```

OUTPUT

▼

SQL

	min numeric	max numeric	avg numeric	sum numeric
1	9.99	29.99	19.98	19984.00

notes

Menampilkan nilai terkecil, terbesar, rata-rata, dan jumlah keseluruhan dari semua data film untuk membantu memahami dan melihat bagian yang perlu diperbaiki

Challenge For Today
#DAY3

Challenge

SYNTAX

```
63 -- In 2020, April 28, 29 and 30 were days with very high revenue.
64 -- That's why we want to focus in this task only on these days
65 -- (filter accordingly).
66 -- Find out what is the average payment amount grouped by
67 -- customer and day- consider only the days/customers with
68 -- more than 1 payment (per customer and day).
69 -- Order by the average amount in a descending order.
70 SELECT customer_id,
71        DATE (payment_date),
72        ROUND (AVG(amount),2) AS avg_amount,
73        COUNT (*)
74 FROM payment
75 WHERE payment_date BETWEEN '2020-04-28' AND '2020-05-01'
76 GROUP BY customer_id,
77        DATE (payment_date)
78 HAVING COUNT (*) > 1
79 ORDER BY avg_amount DESC;
```

notes

Menampilkan rata-rata nilai pembayaran setiap pelanggan per hari pada tanggal 28–30 April 2020, hanya untuk pelanggan yang melakukan lebih dari satu transaksi dalam sehari, lalu mengurutkannya dari rata-rata tertinggi ke terendah.

OUTPUT

Data Output Messages Notifications				
	customer_id smallint	date date	avg_amount numeric	count bigint
1	459	2020-04-29	10.49	2
2	443	2020-04-28	9.49	2
3	203	2020-04-30	9.49	2
4	510	2020-04-28	9.49	2
5	11	2020-04-30	8.49	2
6	582	2020-04-30	8.49	2
7	187	2020-04-28	7.99	2
8	124	2020-04-28	7.99	2
Total rows: 682		Query complete 00:00:00.319		

- Memfilter data transaksi pada 28–30 April 2020.
- Mengelompokkan data berdasarkan pelanggan dan tanggal transaksi.
- Menghitung rata-rata nilai pembayaran untuk setiap pelanggan per hari.
- Hanya menampilkan pelanggan yang melakukan lebih dari 1 transaksi dalam sehari.
- Mengurutkan hasil berdasarkan rata-rata pembayaran tertinggi ke terendah.

THANKYOU
